EDUCATION

Bachelor of IT
University of Palestine
2017 - 2021

ACHIEVEMENTS

Laravel PHP
Vision Plus
Jane 2020 - Sep 2020

Laravel PHP
Ajyal Foundation
Aug 2021 - Sep 2021

SKILLS

- HTML
- CSS
- JavaScript
- BOOTSTRAP
- jQuery
- Sass
- MySQL
- Laravel
- Git
- GitHub
- Restful API
- Multi tenancy

ABOUT ME

My journey into web development began during my university years when I discovered the power of creating digital solutions that solve real-world problems. What started as curiosity about how websites work evolved into a passionate career dedicated to building scalable, user-centric applications.

Over the past 5+ years, I've had the privilege of working with diverse teams and clients, from startups to established companies, always focusing on clean code, performance optimization, and delivering exceptional user experiences. Each project has taught me something new and reinforced my belief that great software comes from understanding both the technical challenges and the human needs behind them.

SOFT SKILLS

Communication

ASkilled in communicating complex technical ideas clearly, fostering team collaboration, and articulating project needs with precision to stakeholders.

Problem-solving

Naturally adept at dissecting complex problems and devising innovative solutions to enhance project efficiency and streamline processes.

Attention to detail

Recognized for meticulous attention to detail across all stages of software development, ensuring clean, readable code, thorough testing, and high-quality project deliverables.

Time management

PProficient in managing project timelines and deadlines, adept at prioritizing tasks to maximize productivity and consistently deliver results within specified timeframes.

Adaptability

Adaptable to new technologies, proactive in learning and integrating cutting-edge tools to stay ahead in a rapidly evolving industry.

Time management

Excel in collaborative environments, fostering positive team dynamics through open communication, active participation, and knowledge sharing to achieve collective goals seamlessly.

WORK EXPERIENCE

Development Team Lead
Oyoun Media

Jul 2024 - present

As a Team Lead at Oyoun Media, I am responsible for the successful execution of projects by coordinating cross-functional teams of backend and frontend developers. My primary focus is on ensuring the seamless integration of new APIs, middleware, and system updates to optimize organizational workflows. I lead and mentor a diverse team of developers to efficiently achieve project goals, overseeing the integration of new APIs and updating existing systems to enhance operational efficiency. I work closely with the Project Manager to thoroughly understand project requirements and effectively communicate them to the team. Additionally, I develop and manage tasks for both backend and frontend developers, including refactoring controllers and resolving conflicts, ensuring the delivery of innovative technical solutions that align with organizational objectives and enhance overall performance.

Full-stack Laravel Developer
Oyoun Media

Aug 2022 - Jul 2024

During my tenure at Oyoun Media, I participated in numerous prominent projects, the most significant of which was the development of Learning Academy. It is an advanced educational platform based on a multi-tenant system that integrates smoothly with various services and websites offering educational courses.
My responsibilities included developing the backend of the system using technologies such as Laravel PHP, MySQL, and REST API. These efforts focused on enhancing performance and seamless integration with other educational platforms.
This project underscores my commitment to delivering innovative technical solutions that support educational objectives and enhance learner development.

Full-stack Laravel Developer
Freelancer

Sep 2021 - Aug 2022

As a Full Stack Laravel Developer, I operated independently as a freelancer. During this period, I undertook diverse projects, leveraging Laravel's robust framework to deliver tailored solutions to clients' specific needs. My responsibilities encompassed both front-end and back-end development, ensuring seamless functionality and optimal performance across various projects.

Full-stack Laravel Developer
Droopuni Startup

May 2021 - Sep 2021

As a Full-stack Laravel Developer at Droopuni Startup, I played a key role in the development and enhancement of innovative web solutions. My responsibilities included designing and implementing features, optimizing performance, and ensuring seamless functionality across both front-end and back-end systems. This experience honed my expertise in Laravel development, project management, and collaboration within a dynamic startup environment.

Full-stack Laravel Developer
Al-Tariq Software Projects

Oct 2020 - Feb 2021

As a Laravel Developer at Al-Tariq Software Projects from October 2020 to February 2021, I embarked on my professional journey in the field of web development with enthusiasm and a thirst for learning. During this formative period, I gained invaluable hands-on experience in Laravel development, laying the foundation for my career in software engineering. However, I made the decision to transition away from this role to focus on my university studies at that time. Nonetheless, the experience I gained during my time at Al-Tariq Software Projects provided me with valuable insights and skills that continue to inform my approach to software development today.
